DEPARTMENT OF ENVIRONMENTAL PROTECTION

BETHLEHEM DISTRICT OFFICE

March 1, 2013

Lower Saucon Township Manager
3700 Old Philadelphia Pike
Bethlehem, PA 18015

Attn: Mr. Jack Cahalan

Re: IESI PA Bethlehem Landfill
I.D. #100020
Lower Saucon Township, Northampton County

Dear Mr. Cahalan:

Please find enclosed a copy of the report of an inspection performed by this District Office at the IESI PA Bethlehem Landfill, located in your municipality. A copy of the inspection report is being provided to you pursuant to the provisions of Section 1101(a)(1) of Act 101, the Municipal Waste Planning, Recycling and Waste Reduction Act of 1988.

If you have any questions, please feel free to contact me at 610-861-2136.

Sincerely,

Walter F. Govern III

INSPECTION REPORT COMMENTS

Date of Inspection 02/27/2013 Identification Number 100020

Company/Facility/Site Name IESI PA BETHLEHEM LANDFILL

Comments:

On February 27, 2013, a routine complete inspection was conducted at IESI PA Bethlehem Landfill (IESI). Representing the PA Department of Environmental Protection (Department) was Solid Waste Specialist Walter F. Govern III (this inspector). Representing IESI PA Bethlehem Landfill (IESI) during this inspection was Jill Hurst, Weighmaster, and Al Schleyer, Compliance Manager, by phone.

On February 14, 2013, Susan French was on-site at IESI representing the Department.

Prior to entering the landfill for the inspection, an odor patrol was conducted along Applebutter Road, throughout Steel City and around the north side of the landfill on Riverside Drive. No landfill related odors were observed during this odor patrol. No malodors were observed during this inspection. IESI appears to be implementing their Nuisance Minimization and Control Plan as required.

The entrance road to the facility and the access roads to the working face were clean and free of litter and debris. The street sweeper was observed in operation during the time of this inspection. The truck wash was also in use during the time of this inspection. No windblown litter was observed in the trees within the landfills fences. No windblown litter was observed on the slopes of the landfill during the time of this inspection.

The flare was in operation at IESI during the time of this inspection. It was burning landfill gas at a temperature of 1662 °F at a flow rate of 2484 scfm.

Cell 4E Stage 1 is the area that is accepting waste during the time of this inspection. There were two trucks dumping at the working face during the time this inspector was observing the working face. Eight trucks were waiting to dump. The reason so many trucks were waiting was because the working face only allows two to three trucks to dump at a time. Operations at the working face were temporarily suspended for a scheduled blasting event at the landfill.

IESI completed capping activities of parts of Cell 4A, 4B, and 4C. The capping project completed approximately 2 acres of the southern slope. The area was hydroseeded and stabilized for the winter to help prevent erosion.

No landfill gas odors were detected during the time of this inspection. The vertical wells are operating normally and IESI is in the process of installing additional horizontal well to help control odors at the northwestern side of the landfill.

The radiation logs for February to the date of this inspection were reviewed. There were three radiation hits since this inspector's last inspection. On 02/04/2013, 02/22/2013 at 0713 hrs and 02/22/2013 at 0749 hrs, Te-99 was detected at level 1 alarms. The loads were disposed of at IESI as per the Radiation Action Monitoring Plan. Log sheets were reviewed showing that the radiation monitors were detecting hits on known sources. Radiation monitor calibration was calibrated on June 20, 2012. The radiation monitor is due for calibration on June 20, 2013.

Daily tonnage reports were observed for February. The weight logs appear complete. The maximum daily tonnage observed in February to the date of this inspection was logged on 02/20/2013 at 1,779 tons. The overweight report for the month of February logged 31 overweight trucks to the date of this inspection. Four of the trucks were over the 3% mark. A copy of the overweight trucks report February is attached to this report.

IESI ran an advertisement for public drop off at the landfill from January 1st through January 3rd in the Morning Call.

Insurance certificates were reviewed and are valid. The certificate expires 01/31/2013.

This concludes this inspection report.

[Handwritten signature]
02/27/2013

This inspection report is notice of the findings of an inspection conducted by a representative of the Department. This report is formal notification of any violations observed during the inspection. Additional notification of violations may be issued concerning either violations noted herein, or other violations identified as a result of review of laboratory analyses or Department records.

This report does not constitute an order or other appealable action of the Department. Nothing contained herein shall be deemed to grant or imply immunity from legal action for any violation noted herein.

Signature by the persons interviewed does not necessarily imply concurrence with the findings on this report, but does acknowledge that the person was shown the report or that a copy was left with the person.
