Bethlehem, PA 18015

Attn: Mr. Jack Cahalan

Re: IESI PA Bethlehem Landfill
I.D. #100020
Lower Saucon Township, Northampton County

Dear Mr. Cahalan:

Please find enclosed a copy of the report of an inspection performed by this District Office at the IESI PA Bethlehem Landfill, located in your municipality. A copy of the inspection report is being provided to you pursuant to the provisions of Section 1101(a)(1) of Act 101, the Municipal Waste Planning, Recycling and Waste Reduction Act of 1988.

If you have any questions, please feel free to contact me at 610-861-2136.

Sincerely,

Walter F. Govern III
Solid Waste Specialist

INSPECTION REPORT COMMENTS

Date of Inspection 03/27/2014 Identification Number 100020

Company/Facility/Site Name IESI PA BETHLEHEM LANDFILL

Comments:

On March 27, 2014, a routine monthly inspection was conducted in the afternoon at IESI PA Bethlehem Landfill (IESI). Also during this inspection, an investigation was conducted as a result of an odor complaint received by the Department on March 2, 2014 at approximately 0829 hrs and on March 22, 2014 at approximately 0634 hrs. Attending the inspection was Walter F. Govern III (this inspector) and Dean Fisher, Department Solid Waste Supervisor, representing the PA Department of Environmental Protection (Department). Representing IESI PA Bethlehem Landfill (IESI) during this inspection was Al Schleyer, Compliance Manager. During the time of this inspection it was sunny, 28°F, wind out of the Northwest at 6 mph. (www.accuweather.com)

On March 12, 2014, Susan French was onsite representing the Department. On March 18, 2014, Bharat Bham was onsite representing the Department.

Prior to entering the landfill for the inspection, an odor patrol was conducted along Applebutter Road, throughout Steel City and around the north side of the landfill on Riverside Drive, out to Barron Hill Road and along Skyline Drive. During the time of this inspection this inspector observed no landfill related odors. No malodors were observed during this inspection. IESI appears to be implementing their Nuisance Minimization and Control Plan as required.

The entrance road to the facility and the access roads to the working face were clean and free of litter and debris. Some windblown litter was observed on the north side of the landfill. Mr. Schleyer stated that the laborers are currently clean litter on the west slope and that they are working towards the north side of the landfill.

The flare was not in operation at IESI during the time of this inspection. During cold days, IESI shuts the Flare down to allow the energy plant adjacent to IESI to run at max speed. At the end of the day the flare is started up to help minimize odors overnight. Landfill gas from IESI was being burned at the Bethlehem Renewable Energy (BRE) Plant adjacent the landfill during the time of this inspection.

Construction of the next area of capping is complete. The area that was capped is a one acre area at the toe of the slope of Cell C.

Since the last inspection, IESI installed seven new vertical gas wells and two horizontal gas wells to aid in efficient collection of landfill gas from the facility. During the time of this inspection, IESI was in the process of tying in the new gas wells to the header of the gas collection system.

This inspector observed some erosion and some seeps on the western slope. Mr. Schleyer stated that repairs to a seep on the southern slope are underway and that the crew conducting repairs will move to the western slope to repair the erosion and seeps located there.

Cell 4E Stage II was the area accepting waste during the time of this inspection. There were two trucks dumping at the working face during the time this inspector was observing the working face. No trucks were waiting to dump during the time of this inspection. No landfill gas odors were detected during the time of this inspection. Tippers are not yet in use at the landfill. Mr. Schleyer stated that tippers are most likely going to arrive at the landfill sometime in mid-April.

The radiation logs for March to the date of this inspection were reviewed. There was one radiation hits since this inspector's last inspection. On 03/12/2014, I-131 was detected at a level 1 alarm. The load was dumped at IESI as per the radiation action monitoring plan. Log sheets were reviewed showing that the radiation monitors were detecting hits on known sources. Calibration for the radiation monitor was conducted on 06/24/2013 and is due

06/24/2014.

Daily tonnage reports were observed for March to the date of this inspection. The weight logs appear complete. The maximum daily tonnage observed in March to the date of this inspection was logged on 03/11/2014 at 1,281.1 tons. The overweight report for the month of March logged 34 overweight trucks to the date of this inspection. None of the trucks were over the 3% mark. A copy of the overweight trucks report for March is attached to this report. The scale was last calibrated on 12/30/2013. It is due for calibration in June 2014.

IESI submitted a letter to Lower Saucon Township regarding the weight and types of materials that were recycled on January 6, 2014.

IESI ran an advertisement for public drop off at the landfill from January 3rd, 4th, and 5th, 2014 in the Express Times.

Insurance certificates were reviewed and are valid. The certificate expires 12/31/2014.

COMPLAINT INVESTGATIONS

On 03/02/2014 at approx. 0829 hrs: An individual reported a strong odor while on Applebutter Road at approximately 0736 hrs. During the time of the complaint, landfill gas was being burned in the flare at a flow of 1035 scfm. The energy plant adjacent IESI was also burning landfill gas at 2345 scfm. Landfill gas was being consumed by the flare and the adjacent energy plant at a total of 3380 scfm during the time of this complaint. IESI appeared to be implementing their Nuisance Minimization and Control Plan as required.

On 03/22/2014 at approx. 0634 hrs: An individual reported an odor coming from the landfill. This inspector attempted to contact the complainant to gather additional information, but the complaint to date has not returned this inspector's phone calls. During the time of the complaint, landfill gas was being burned in the flare at a flow of 925 scfm. The energy plant adjacent IESI was also burning landfill gas at 2268 scfm. Landfill gas was being consumed by the flare and the adjacent energy plant at a total of 3193 scfm during the time of this complaint. IESI appeared to be implementing their Nuisance Minimization and Control Plan as required.

This concludes this inspection report.

This inspection report is notice of the findings of an inspection conducted by a representative of the Department. This report is formal notification of any violations observed during the inspection. Additional notification of violations may be issued concerning either violations noted herein, or other violations identified as a result of review of laboratory analyses or Department records.

This report does not constitute an order or other appealable action of the Department. Nothing contained herein shall be deemed to grant or imply immunity from legal action for any violation noted herein.

Signature by the persons interviewed does not necessarily imply concurrence with the findings on this report, but does acknowledge that the person was shown the report or that a copy was left with the person.

Thanks for this Al!

Greatly appreciated.

Any update on the Energy Plant Gas data? It's the only thing I'm waiting on to get the report out the door.

Wally;

Easier to email a copy for your review/records.

Also waiting for BRE to reply about the 3/22 odor complaint.
